

What is automated single stream recycling? Does this mean I no longer need to separate my trash from my recyclables?

No, Automated single stream recycling does not mean you can mix your trash together with your recyclables. With automated single stream recycling, all recycle materials are placed in your new green recycling cart and your trash

Will go in a barrel or one bag (stay the same)

It is suggested however, that you put the heavy newspapers at the bottom of your cart and lighter material on top.

What if I have more recyclable materials than will fit in my recycling cart?

Your new automated single stream recycling cart will have 4 times the capacity of your present 18 gallon recycling bin so by flattening the corrugated cardboard, there should be more than enough room.

We will have to order more carts if an additional cart is needed and there will be a cost for the additional cart.

Can I put leaves and grass in this new recycle cart?

No, these items are not part of this automated single stream recycle collection program and must still be recycled separately.

What if my recycling cart becomes dirty? Can I get a new one?

No, Residents are responsible for keeping their carts clean. By disposing of clean, rinsed recyclables, your cart should stay clean.

When putting recyclables in the cart, can I put them in a bag or do they have to be loose in the cart?

Your recyclables need to be in the cart loose. Excluding shredded paper
